

I support that the current Amerature Radio testing requirements need amended.

I do not intend to ever use CW (Morse Code) in my communications. Due to my desire not to use or learn this mode I am hindered from serving my country to the fullest capacity possible.

I am capable of operating phone (voice), yet because I can not do CW I can not operate phone on a non-Technician frequency. I find this highly disrespectful to my desire to serve in times of need.

Keep the CW exam as an option for use of those allotted CW frequencies, but do not require it to operate on non - allocated frequencies.

Respectfully Submitted.
